## *What All Student Clients Should Know*

---

In order to truly love what they do, here are what all student clients should know as they explore and plan their career.

### **Be Bold**

- Feel empowered means being bold.
- Be unapologetic in your quest to find success and happiness. Don't allow seeds of doubt to be planted and for those old roots to keep you where you're at.

### **Make Your Skills Work For You**

- You have to create career happiness. Unfortunately, it rarely just happens to you out of sheer coincidence. You'll have to consider persistence and perseverance your new best friends and be unrelenting in pursuing your goals.
- You can accomplish much more if you make your skills work for you, and this is something we'll strengthen and capitalize on during our sessions.

### **Get Comfortable Feeling Uncomfortable**

- We all have to become comfortable feeling uncomfortable.
- Discomfort is a huge motivating factor. We all want to feel better, and this is a case where succeeding and feeling great relies on powering through discomfort.
- With the right support system, we can take feelings of discomfort about the unknown and turn it into something that'll drive you to the perfect career for you.

## **Bottom line.....**

The time is right now.

You deserve this.
